[Genomics of Plant-Associated Bacteria](#) Apr 12 2021 This book describes how genomics has revolutionized our scientific understanding of agriculturally important plant-associated bacteria. Each chapter focuses on the genomics of particular bacteria: the first described plant pathogen, *Erwinia amylovora*; phytoplasmas lacking cell walls; fastidious, phloem-restricted liberibacters; *Pseudomonas syringae*, which is a genetically tractable model system; *Xanthomonas citri*, which causes a disease that can devastate citrus crops and *Pseudomonas fluorescens*, which can protect plants from diseases. Topics considered in this volume include the importance of horizontal gene transfer in originating new bacterial strains and species and advances in transcriptomics that allow us to describe the complex regulatory networks critical to plant-microbe interactions. The availability of the *Xanthomonas oryzae* genome has led to new technologies in genome editing, which will revolutionize approaches to genetic engineering, even in eukaryotes. The contributions show how genomics has greatly accelerated progress toward understanding the biology of these bacteria and how that understanding can be translated into novel crop protection methods.

Elijah's Cup Jun 14 2021 Faced with her two-year-old toddler's precipitous bout with epilepsy and his puzzling behaviors, Valerie Paradiz took a bold and unusual path, coming to terms with and ultimately embracing the strange beauty of her son Elijah's special neurological disorder, which was diagnosed as Asperger's syndrome, a form of autism. In *Elijah's Cup*, Paradiz tells the powerful story of her family's struggle with her son's disease, one characterized by social awkwardness, literal-mindedness, and a fixation with particular subjects and interests. Like attention deficit disorder (ADD), dyslexia, depression, and obsessive-compulsive disorder, Asperger's has exploded in diagnosis in the last decade, reconfiguring the known incidence of autism in the population with estimates as high as one in fifty people. Ever since autism was "discovered" by researchers in the 1940s, the disability has been under the strict purview of professionals in medicine, psychiatry, and education. Like the deaf community, autistics themselves have had little voice in expressing their real experience and needs. They were framed as too "sick" to be conscious of their own internal lives, too "mentally ill" to possess an identity. All this has changed. Today there is a blossoming movement of autistic self-advocacy groups and alliances that pose challenging questions to the medical status quo. A fascinating, independent expression of another way of life, full of quirkiness, hardship, and humor, has emerged. *Elijah's Cup* is a provocative and pioneering book that pushes the envelope of what we know about autism. Were Andy Warhol, Albert Einstein, and the comedian Andy Kaufman, whom we usually think of as brilliant eccentrics, autistic? Can these figures serve as role models to this community? *Elijah's Cup* offers a refreshing take on mental disability from the perspective of civil rights, history, and the arts. From encounters with the founders of the first civil rights organizations for autistics, who guide Paradiz and her son toward a sense of community and self-respect, and with visual artists, who share with Elijah their special ability to "think in pictures," Elijah reaches extraordinary heights in his sociability and emotional well-being. In this utterly absorbing and inspiring narrative, Paradiz also reveals her own shadow syndrome, which afflicts many family members of autistics. She is a "cousin," a genetic link to her son's autism. Standing as she does on this cultural borderline, Paradiz is a sensitive translator between two worlds, revealing a groundbreaking insider's view of the beauty of minds hidden in the shadows of autism.

Virtual Homelands May 26 2022 The internet has transformed the idea of home for Indians and Indian Americans. In *Virtual Homelands: Indian Immigrants and Online Cultures in the United States*, Madhavi Mallapragada analyzes home pages and other online communities organized by diasporic and immigrant Indians from the late 1990s through the social media period. Engaging the shifting aspects of belonging, immigrant politics, and cultural citizenship by linking the home page, household, and homeland as key sites, Mallapragada illuminates the contours of belonging and reveals how Indian American struggles over it trace back to the web's active mediation in representing, negotiating, and reimagining "home." As Mallapragada shows, ideologies around family and citizenship shift to fit the transnational contexts of the online world and immigration. At the same time, the tactical use of the home page to make gender, racial, and class struggles visible and create new modes for belonging implicates the web within complex political and cultural terrain. On e-commerce, community, and activist sites, the recasting of home and homeland online points to intrusion by public agents such as the state, the law, and immigration systems in the domestic, the private, and the familial. Mallapragada reveals that the home page may mobilize to reproduce conservative narratives of Indian immigrants' familial and citizenship cultures, but the reach of a website extends beyond the textual and discursive to encompass the institutions shaping it, as the web unmakes and remakes ideas of "India" and "America."

Migrant Returns Mar 12 2021 In *Migrant Returns* Eric J. Pido examines the complicated relationship among the Philippine economy, Manila's urban development, and balikbayans—Filipino migrants visiting or returning to their homeland—to reconceptualize migration as a process of connectivity. Focusing on the experiences of balikbayans returning to Manila from California, Pido shows how Philippine economic and labor policies have created an economy reliant upon property speculation, financial remittances, and the affective labor of Filipinos living abroad. As the initial generation of post-1965 Filipino migrants begin to age, they are encouraged to retire in their homeland through various state-sponsored incentives. Yet, once they arrive, balikbayans often find themselves in the paradoxical position of being neither foreign nor local. They must reconcile their memories of their Filipino upbringing with American conceptions of security, sociality, modernity, and class as their homecoming comes into collision with the Philippines' deep economic and social inequality. Tracing the complexity of balikbayan migration, Pido shows that rather than being a unidirectional event marking the end of a journey, migration is a multidirectional and continuous process that results in ambivalence, anxiety, relief, and difficulty.

A Bad Idea I'm About to Do Dec 29 2019 Chris Gethard has often found himself in awkward situations most people, including you, probably would have safely avoided. The good news is now, thanks to this book, you can enjoy the painfully funny consequences of his unfortunate decisions at a safe distance. *A Bad Idea I'm About to Do* invites readers to join Chris as he navigates an adolescence and adulthood mired in hilariously ill-fated nerdism, and to take comfort in the fact that - as his experiences often prove - things could always be much, much worse.

Slow Motion Dec 21 2021 From one of the most gifted writers of her generation comes the harrowing and exquisitely written true story of how a family tragedy saved her life. Dani Shapiro was a young girl from a deeply religious home who became the girlfriend of a famous and flamboyant married attorney—her best friend's stepfather. The moment Lenny Klein entered her life, everything changed: she dropped out of college, began to drink heavily, and became estranged from her family and friends. But then the phone call came. There had been an accident on a snowy road near her family's home in New Jersey, and both her parents lay hospitalized in critical condition. This haunting memoir traces her journey back into the world she had left behind. At a time when she was barely able to take care of herself, she was faced with the terrifying task of taking care of two people who needed her desperately. Dani Shapiro charts a riveting emotional course as she retraces her isolated, overprotected Orthodox Jewish childhood in an anti-Semitic suburb, and draws the connections between that childhood and her inevitable rebellion and self-destructiveness. She tells of a life nearly ruined by the gift of beauty, and then saved by the worst thing imaginable. This is a beautiful and unforgettable memoir of a life utterly transformed by tragedy.

Political Economy, Linguistics and Culture Apr 24 2022 Social sciences and economics have undergone enormous progress. While certain topics have been fully researched, others have remained largely under-researched or ignored. It is this discrepancy which prompted the research paradigm of "Crossing Bridges". For this volume, ten authors have joined forces to address the problem of under-researched topics, focusing in particular on gaps in interdisciplinary research between economics and other social sciences.
