Female Football Fans Feb 23 2022 Most sociological work on football fandom has focused on the experience of men, and it usually talks about alcohol, fighting and general hooliganism. This book shows that there are some unique facets of female experience and fascinating negotiations of identity within the male-dominated world of men's professional football.

English National Identity and Football Fan Culture Feb 11 2021 In recent years, scholars have understood the increasing use of the St George's Cross by football fans to be evidence of a rise in a specifically 'English' identity. This has emerged as part of a wider 'national' response to broader political processes such as devolution and European integration which have fragmented identities within the UK. Using the controversial figurational sociological approach advocated by the twentieth-century theorist Norbert Elias, this book challenges such a view, drawing on ethnographic research amongst fans to explore the precise nature of the relationship between contemporary English national identity and football fan culture. Examining football fans' expressions of Englishness in public houses and online spaces, the author discusses the effects of globalization, European integration and UK devolution on English society, revealing that the use of the St George's Cross does not signal the emergence of a specifically 'English' national consciousness, but in fact masks a more complex, multi-layered process of national identity construction. A detailed and grounded study of identity, nationalism and globalization amongst football fans, English National Identity and Football Fan Culture will appeal to scholars and students of politics, sociology and anthropology with interests in ethnography, the sociology of sport, fan cultures, globalization and contemporary national identities.

Seismic Facies and Sedimentary Processes of Submarine Fans and Turbidite Systems Sep 20 2021 The Frontiers in Sedimentary Geology series was established for the student, the researcher, and the applied scientist to enhance their potential to stay abreast of the most recent ideas and developments and to become familiar with certain topics in the field of sedimentary geology. This series deals with subjects that are in the forefront of both scientific and economic interests. The treatment of a subject in an individual volume, therefore, should be a combination of topical, regional, and interdisciplinary approaches. The interdisciplinary aspects are becoming more and more important because most studies dealing with the natural sciences cannot effectively stand alone. Although this thrust may sound simple, in reality it is not, but clearly because each discipline has developed its own jargon and definitions often. Communication among disciplines is a major issue and can be accomplished more constructively when people with different backgrounds join together at the same symposium and can read from the same volume rather than confining themselves within the world of their own specialty meetings and journals. Books in this series provide this connective link between disciplines. Each book in this series provides a continuous and connected flow of concepts throughout the volume by the use of introductory chapters that outline a topic to help the reader grasp its problems and to understand the contributions that follow.

So Loved the World May 29 2022 God is a radical Democrat ... but not the kind you think. Rather, God is committed to giving power away to people He loves. He is a revolutionary democratizer. Too often we hoard power and accumulate authority, but God has called us to live like He does—continually giving our power away to others in the beautiful mutual submission known as love. *So Loved the World* examines how God does that throughout the world and considers how we can live in that spirit too. Authors Daniel S. Ferguson and Lori S. Ferguson provide real-life examples of democratization as a way of seeing what its core elements are. They then take a deep dive into the Scriptures to understand just how much God loves us and is committed to the democratization of His power. Finally, they address how everyone—especially Christians and churches—can give their power away in the same way God does, for the betterment of all. This faith-filled study explores ways to give power away instead of hoarding it and proposes methods for winning back those who have left the church through mutual friendship and love.

Fandom, Now in Color Jun 17 2021 Fandom, Now in Color gathers together seemingly contradictory narratives that intersect at the (in)visibility of race/ism in fandom and fan studies. This collection engages the problem by undertaking the different tactics of decolonization—diversifying methodologies, destabilizing canons of "must-read" scholarship by engaging with multiple disciplines, making whiteness visible but not the default against which all other kinds of racialization must compete, and decentering white fans even in those fandoms where they are the assumed majority. These new narratives concern themselves with a broad swath of media, from cosplay and comics to tabletop roleplay and video games, and fandoms from *Jane the Virgin* to Japan's K-pop scene. Fandom, Now in Color asserts that no one answer or approach can sufficiently come to grips with the shifting categories of race, racism, and racial identity. Contributors: McKenna Boeckner, Angie Fazekas, Monica Flegel, Elizabeth Hornsby, Katherine Anderson Howell, Carina Lapointe, Miranda Ruth Larsen, Judith Leggatt, Jenni Lehtinen, joan miller, Swati Moitra, Samira Nadkarni, Indira Neill Hoch, Sam Pack, Rukmini Pande, Deepa Sivarajan, Al Valentin *The Fan Jul 19 2021*
