Essentials of Corporate Finance Dec 07 2020 Essentials of Corporate Finance, 5/e by Ross, Westerfield, and Jordan is written to convey the most important concepts and principles of corporate finance at a level that is approachable for a wide audience. The authors retain their modern approach to finance, but have distilled the subject down to the essential topics in 18 chapters. They believe that understanding the "why" is just as important, if not more so, than understanding the "how," especially in an introductory course. Three basic themes emerge as their central focus: 1. An emphasis on intuition -- separate and explain the principles at work on a common sense, intuitive level before launching into specifics. Underlying ideas are discussed first in general terms, then followed by specific examples that illustrate in more concrete terms how a financial manager might proceed in a given situation. 2. A unified valuation approach -- Net Present Value is treated as the basic concept underlying corporate finance. Every subject the authors cover is firmly rooted in valuation, and care is taken to explain how decisions have valuation effects. 3. A managerial focus -- Students learn that financial management concerns management. The role of financial manager as decision maker is emphasized and they stress the need for managerial input and judgment.

Discourse Markers and Beyond Dec 27 2019 This book explores the use of discourse markers - lexical items where drawing a distinction between propositional and non-propositional, syntactically-semantically integrated and discourse-pragmatic uses is especially relevant. Using a combination of qualitative and quantitative methodologies, descriptive and critical (CDA) perspectives, and manual annotation and automatized analyses, the author argues that Discourse Markers (DMs) cannot be effectively studied in isolation, but must instead be contextualised with reference to other discourse-pragmatic devices and their language and genre backgrounds. This book will be of interest to students and academics working in the fields of DM research and critical discourse studies, and will also appeal to scholars working in areas such as genre studies, second language acquisition (SLA), literary analysis, contemporary cinematography, Tolkien scholarship, and Bible studies.
